“Responsible Gifting...”

Our promotional gifts are crafted from carefully selected materials that prioritize sustainability and environmental responsibility. By using recycled and natural materials, these gifts significantly reduce the harmful impacts of manufacturing, conserve resources, save energy, and minimize waste. Their durable design ensures extended use, while their renewable or biodegradable components help lower carbon footprints. Eco-Friendly gifts not only support a greener lifestyle but also symbolize a commitment to environmental and social responsibility.

ECO-Friendly collection

Discover a wide range of eco friendly products and sustainable gifts. Perfect for eco conscious individuals and businesses.

A black backpack is centered in the frame, resting on a weathered wooden log. The background is a blurred field of dry grass under a clear sky. The backpack has white text printed on its front pocket. The text reads: 'TRUE AMERICAN' in a small, arched font; 'RIDE' in a large, bold, distressed font; 'BIKER TEAM' in a smaller, bold font; and 'SINCE 1875' in a small font at the bottom.

TRUE AMERICAN
RIDE
BIKER TEAM
SINCE 1875

RPET

Promotional Giftset

Recycled polyester (RPET) is a fabric made from recycled polyethylene terephthalate (PET), which is a type of plastic. PET is a synthesis of ethylene glycol and dimethyl terephthalate, both of which are derived from petroleum. It's the same material that virgin polyester fibers are made from, but the recycled version of the fabric draws its source of PET mostly from discarded clear plastic water bottles.

GS-21

Product Includes : RPET Mouse Pad with wireless charging(11445),
RPET Charging cable- Lightup(11493)
Recycled (PET + ABS) material Power Bank(11495).

Promotional

Collection

Discover our versatile range of promotional gifts designed to leave a lasting impression! From sleek keychains and trendy wristbands to coloring book collections, durable mousepads, and car sunshades etc.

GROW WHILE YOU WRITE!

Product Highlights:

- Seed Varieties Included: Tomato, Coriander, and Chilly.
- Eco-Conscious Design: Made from %100 biodegradable materials.
- Multi-Purpose: Write today, plant tomorrow.
- Giftable Packaging: Ideal for corporate gifting, students, and nature enthusiasts.

How It Works:

- Use the pencil until it's too short to write.
- Plant the stub in soil, seed-side down.
- Water it, place it in sunlight, and watch your plant grow!

Printing technologies

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies. The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

SCREEN PRINTING

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

UV DTF PRINTING

UV DTF (Direct-to-Film) Printing is an innovative printing process that utilizes a UV printer to print directly to film that uses a UV printing technique, which enables the direct application of ink onto a transparent and thin film material. This printing method allows for vibrant colors and intricate designs to be transferred onto the desired surface.

UV PRINTING

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

HEAT TRANSFER

Digital transfer printing is a modern, full-colour alternative to traditional transfer printing. The design is printed in photo quality onto transfer paper with a special digital printer, then applied to the product with a heat press. Our digital transfer technology carries no limitation in size or shape of imprints.

Printing technologies

EMBROIDERY

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.

DIGITAL PRINTING

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

LASER ENGRAVING

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

SUBLIMATION PRINTING

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface. Sublimation is only applicable to light coloured polyester and sublimation coated products.

EPOXY DOMING

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

EMBOSSING/DEBOSSING

Embossing and Debossing are the processes of creating either raised or recessed images. Embossing requires an etched metal die (female) and a matching counter die (male). The paper stock is pressed between the heated die and the counter and the image is pressed into the back of the stock to create a raised image.
